Dear Eco Urban Gardens,

Congratulations! Your group's impressive work this year on behalf of people, animals, and the environment has qualified you to receive an official Roots & Shoots Certificate of Recognition. This recognition is awarded only to the most active and influential groups — those whose commitment and creativity are truly making the world a better place. We applaud you! You inspire us.

It's been more than 26 years since Dr. Jane and a group of teenagers in Tanzania turned a back porch gathering into strategy session that would start them on a journey toward building a better future. Those 12 students became the very first Roots & Shoots group...the first of now thousands of groups in more than 100 countries motivated by seeking knowledge, living compassionately, and taking action to create a better world for all living things.

You are among these change-makers who help us move towards a future in which our planet is healthy, wildlife species thrive, and people treat each other with respect and compassion. Your group's work is a part of a growing global network that together is improving our world and carrying on Dr. Jane's legacy.

We hope that you are as impressed with your accomplishments as we are of you! We look forward to hearing more about your projects in 2017-2018. As you continue to share your projects in the Roots & Shoots Project Database, we encourage you to check in on rootsandshoots.org, keep up with us via Dr. Jane's Good For All News (news.janegoodall.org), and follow us on social media — maybe you'll see your group's work featured!

Congratulations again, all your hard work has definitely made the world a better place.

Thank you,

Kamilah Martin
